GO WHERE LIFE TAKES YOU

Pulse believe moving freely shouldn't be a struggle. We build electric wheelchairs that give people the power to go where they want, on their own terms. Every chair is designed around comfort, safety, and ease of use, so daily life feels simpler for users and their families.

What started as a mission to make mobility easier has grown into a commitment to making healthcare more accessible. We pair smart engineering with real user feedback to create reliable, easy-to-maintain products, backed by service you can count on. From the first consultation to long-term support, we're here to help people move with confidence and live with greater independence.

OUR WHEELCHAIR RANGE

Heavy-Duty Frame

6Km/h Top Speed

15 Km Range*
